## Disclaimer

*Last Updated: 2026-03-19*

### 1. General Disclaimer

---

Materials, products, services, files, templates, resources, pages, and related content made available by ZA Digital Solutions are provided as made available and should not be understood as a promise of perfection, permanence, universal compatibility, uninterrupted availability, unlimited support, or suitability for every use case, system, platform, workflow, or operating environment.

ZA Digital Solutions does not represent that every offering will be suitable for every user, purpose, jurisdiction, system, platform, operating context, or practical need.

Users and customers are expected to review the nature, scope, intended use, and practical suitability of any material, product, service, file, template, resource, or page before relying on it in a significant, legal, commercial, technical, or operational context.

### 2. No Professional Advice

---

Unless expressly stated otherwise in writing, ZA Digital Solutions materials do not constitute legal, financial, tax, regulatory, compliance, investment, medical, or other licensed professional advice. They are not presented as a substitute for professional review, professional judgment, or advice from a qualified practitioner licensed, qualified, or otherwise authorized to advise in the relevant field or jurisdiction.

**Important:** ZA Digital Solutions materials do not constitute legal, financial, tax, regulatory, compliance, investment, medical, or other licensed professional advice unless expressly stated otherwise in writing.

Users and customers remain responsible for obtaining qualified professional advice where needed, including jurisdiction-specific review where local law, regulation, compliance requirements, professional standards, or similar obligations may affect their use of any ZA Digital Solutions material, product, service, template, guidance, or document.

### 3. No Guarantee of Particular Outcome

---

ZA Digital Solutions does not guarantee that any product, service, template, document, file, resource, or guidance will produce a specific business, legal, technical, financial, operational, or other result in every case or context.

Examples, explanations, templates, structures, and guidance are provided for general informational or operational use only and do not guarantee any particular outcome, performance level, or practical result.

What is suitable, effective, compliant, or useful in one situation, context, jurisdiction, or operating environment may not be suitable, effective, compliant, or useful in another.

### 4. No Guarantee of Perfection, Continuity, or Error-Free Operation

---

ZA Digital Solutions does not guarantee perfect performance, uninterrupted availability, permanent continuity, flawless operation, or compatibility with every system, environment, platform, workflow, configuration, or operating context.

Digital work may involve delays, compatibility issues, platform problems, provider changes, technical errors, changing conditions, third-party disruptions, external dependencies, or other practical limitations.

### 5. User and Customer Responsibility

---

Users and customers remain responsible for:

- reviewing purchases, deliveries, access, and use;
- checking suitability for their own needs and intended use;
- using materials lawfully, properly, and responsibly;
- preserving their own records, downloads, credentials, and access details;
- evaluating their own technical, legal, commercial, and operational needs;
- verifying suitability before relying on a product, file, template, or output.

These responsibilities remain with the user or customer even where ZA Digital Solutions provides guidance, examples, assistance, or other supporting materials. Users and customers are expected to evaluate suitability and determine appropriate use based on their own needs, context, requirements, and intended purpose.

## 6. Third-Party Elements

---

Some offerings may involve third-party platforms, delivery routes, open-source components, external tools, dependencies, integrations, hosting layers, provider policies, or other external infrastructure or conditions relevant to delivery, access, or use.

ZA Digital Solutions does not control external systems and does not guarantee their uninterrupted operation, future availability, security posture, ongoing compatibility, policy stability, continued terms, or continued practical suitability for every use case or environment.

ZA Digital Solutions is not responsible for external failures, restrictions, outages, removals, policy changes, or other disruptions beyond its reasonable control.

## 7. Support and Follow-Up Limits

---

Unless explicitly promised for a specific offering, ZA Digital Solutions does not provide unlimited support, unlimited revisions, open-ended consulting, permanent administrative follow-up, or continuing assistance without stated scope or limit.

ZA Digital Solutions may provide assistance after purchase, delivery, access activation, or initial contact, but response speed, ongoing monitoring, channel availability, continuity of communication, and continued follow-up are not guaranteed.

## 8. Relationship to Other Documents

---

This Disclaimer must be read together with the applicable Terms and Conditions and any relevant product-level, service-level, checkout, invoice, proposal, license, access, or policy terms.

This Disclaimer does not create any separate guarantee, warranty, or continuing obligation beyond what is expressly stated in the relevant governing document.

Where a more specific document directly addresses a particular subject matter, that document prevails to the extent of that subject matter.

Nothing in this Disclaimer expands any more specific governing term beyond its stated scope.

## 9. Legal Rights Preserved

---

Nothing in this Disclaimer excludes or limits rights, remedies, obligations, or protections that cannot legally be excluded under applicable law.

Where applicable law gives users or customers mandatory protections, those protections remain unaffected by this Disclaimer.

## 10. Language and Interpretation

---

The English version of this Disclaimer is the primary reference version.

Any translation provided now or later is for convenience, accessibility, or broader understanding only. If a material conflict, ambiguity, or inconsistency arises between a translation and the English version, the English version will prevail, unless applicable law requires otherwise.

Where a current version of this Disclaimer is made available on an official ZA Digital Solutions website, page, or publication point, that published version should be treated as the latest reference version.
